S7 : Artificial Intelligence for Cyber Security

Organizer(s) Information:

Dr. Mohammad Tabrez Quasim

Assistant Professor, College of Computing and Information Technology , University of Bisha, Bisha, KSA.

Dr. Mohammad Ayoub Khan

Associate Professor, College of Computing and Information Technology
University of Bisha, Bisha, KSA .

Dr. Fahad Algarni

Associate Professor, College of Computing and Information Technology
University of Bisha, Bisha, KSA.

Dr. Ali Jabar Almaliki

Assistant Professor , College of Computing and Information Technology,
University of Bisha, Bisha, KSA .

Session summary :

Artificial intelligence (AI) has been applied widely to address cyber security problems. Cyber-attacks, however, are growing in volume and complexity. This is of greater concern in the area of sensors and sensing technology, as they are increasingly used in all sorts of platforms inspired by the emerging Internet of Things. There is a critical need for the development of advanced cybersecurity methods to mitigate and eliminate the impacts of cyber-attacks. Protecting and defending mechanisms are required to be more responsive, adaptive, and scalable. Advances in AI can be highly capable of solving complex, dynamic, and especially high-dimensional cyber security problems. They can help to provide more accurate detection, effective response automation, and proactive protection mechanism.

Topics include but are not limited to:

- Cyber Security
- Cyber Situational Awareness
- Cyber Threat Intelligence
- Artificial Intelligence
- Machine Learning

- Formal Knowledge Representation
- Automated Reasoning

Submission:

In order to submit to this session, please write "**S7**" as a prefix to your manuscript name. for example, if you have your file name as "**UAVmobility.pdf**", the submitted file name should be "**S7-UAVmobility.pdf**."

Template: **Template (Word)(6 pages max , 2 more pages with extra fees) (Latex)**
